## ATTACHMENT ITEM 15:

This geothermal wellfield will contain 8 or more production wells which will supply geothermal heat to a power generating facility at Bradys Hot Springs. The geothermal brine will be produced under eight existing water permits which allow a combined flow rate of 33:64 cfs. The eight existing water permits also allow a maximum of 19,571 acrefeet per year of water production, with water consumption limited to 4279 acrefeet per year. Total flow rates, water production and consumptive use will not exceed the combined amount allowed under the eight water permits, nor will flow rates for any one well exceed the allowed 5 cfs. The eight existing water permits are No.s 47166, 48675, 48676, 49944, 49945, 49946, 51592 and 51593.

## (PERMIT TERMS CONTINUED)

other permits from State, Federal and local agencies. A detailed log on the injection well and/or other analyses of the system used for returning the used geothermal fluids to the source must be submitted together with the Proof of Completion.

An annual report for this well must be filed under this permit describing the amount of geothermal fluid diverted and consumed to a beneficial use for the calendar year. This report must detail the amount of fluid produced and injected.

The total combined withdrawal of the geothermal fluid under Permits 57238 through 57245, inclusive, and 57286 through 57297, inclusive shall be limited to 33.64 cfs and not to exceed 19,572 acre-feet per year withdrawal but the total consumptive use of the geothermal fluid is limited to 4,276 acre-feet per year. The State Engineer does not waive the right to make a determination of incidental fluid losses at any time and impose additional conditions thereto. This permit is further issued subject to the provisions of NRS 533.372(1) and with the understanding that the power or energy generated by the beneficial use of this water or steam is subject to recapture and use within the boundaries of the State of Nevada when the need arises.

This permit is further issued subject to the agreements executed by and between Gilroy Foods, Inc. and Brady Hot Springs Geothermal Associates dated December 18, 1987, Gilroy Foods, Inc. and Nevada Geothermal Power Partners, Limited Partnership dated February 1, 1991 and the State Engineer's Ruling No. 3894 dated June 26, 1992.
